

### **Basic Information about practice possibilities:**

#### **Pre-Competition period:**

- A practice schedule is already prepared and distributed to all NOCs.

#### **During-Competition period – FOR ATHLETES on competition:**

- A practice schedule will be available, after the draws and results are available.
- All athletes/teams on competition will be given time slots in the training and warm up areas, before the matches.
- Changes on the table numbers will not be accepted.

#### **General information:**

- In case there are tables available in the training area (not booked for training), practice will be available on a first comes-first serves basis, but we highly recommend to book your training slots in advance.
- During competition days, practice in the warm-up and in the FOP is not allowed, unless announced differently.
- People not directly involved in the preparation of athletes in competition, will be asked to leave the warm-up area, even if accredited. This is to help ensure we can offer the best conditions for athletes to prepare for their matches.
- We would highly appreciate if you can:
  - **Submit** a request for cancellation in case you do not wish to use any of the training slots allocated to your NOC.
  - **Respect** the practice time and table allocations, in order to help having a smooth preparation for all NOCs before and during competition.
  - **Cooperate** in keeping the number of players/coaches and medical staff in warm-up area to the absolute required number.

**Technical Delegate**

**Competition Manager**
